

## ACKNOWLEDGEMENT

I whole heartedly surrender my sincere thanks to the 'Almighty' who gave blessings for completing this work.

Considering this achievement of my dissertation work, for the award of Degree of Doctorate of Philosophy. I gratefully acknowledge to **Sri G. Rangaswamy**, Managing Trustee and **Smt. R. Nandini**, Chair Person P.S.G.R. Krishnammal College for Women for providing me with all the facilities to carry out my project successfully.

I thankfully acknowledge and express my gratitude to **Dr. (Mrs). N. Yesodha Devi, M.Com, Ph.D.**, our Secretary, for her continuous support in all my endeavours.

I am extremely indebted to convey my bouquets of thanks to **Dr.(Mrs.) S. Nirmala, M.B.A., M.Phil, Ph.D.** for her encouragement throughout the successful course of this investigation.

I am most grateful to **Mrs. S. Vasandha, M.Sc, M.Phill**, Dean-Student Affairs, P.S.G.R. Krishnammal College for Women, for her encouragement and blessings during the period of my project work.

I am extremely thankful to **Dr. (Mrs). R.S. Meerabai, M.Sc, M.Phil, B.Ed, Ph.D, PGDCA**, Head, Department of Botany, P.S.G.R. Krishnammal College for Women, for her support and help rendered during the period of my study.

I pay my obeisance to God for having bestowed with an opportunity and privilege of being guided by **Dr.V.Sashi, M.Sc, M.Phil, Ph.D**, Former, Head , Department of Botany, P.S.G.R Krishnammal College for Women. I am indebted to her for suggesting the problem, for the continuous guidance and encouragement given throughout the course of this investigation.

I owe my tribute to **Dr. N.S. Malathy, M.Sc, Ph.D**, Former, Head of the Department of Microbial Biotechnology, P.S.G.R. Krishnammal College for Women and **Dr. K. Mani, M.Sc, Ph.D** Associate Professor(Retd.), Department of Botany, PSG College of Arts and Science, for their blessings and guidance.

I express my deep hearted thanks to **Dr.W.Suganya**, Assistant Professor, LRG Govt Arts College for Women, Tirpur for her encouragement and help rendered to carry out my project successfully.

I am also thankful to DRDO Department, Bharathiar University and SITRA, Coimbatore for granting permission to do testing work in their laboratory.

I express my deep hearted thanks to **Mr. D. Jegadeesh kumar**, Chromopark Research centre, Nammakal, for permitting me to carry out a part of my work and for his valuable guidance.

I express my gratitude to all the **Teaching faculty**, Department of Botany, P.S.G.R.Krishnammal College for Women, for their encouragement.

My sincere thanks to due to all the **non-teaching staff members**, Department of Botany, P.S.G.R.Krishnammal College for Women, for their assistance rendered.

I gratefully acknowledge the University Grants Commission (UGC), for giving me the Financial Assistance during the tenure of this investigation.

I am greatly thankful to all my **well-wishers, friends, class mates** for their inspiration and help.

The whole credit of my achievements goes to my Father **Mr.R.Rathinsamy** and my beloved husband **Mr. G.Sivakumar** and my sisters **Miss.S.Sivaranjini** and **Miss.S.Radhika** for their kind encouragement.

My sincere and special thanks are due to my father-in-law, **Mr. A.Gopalakrishnan** and My mother-in-law, **Mrs. G.Kamala**, for their co-operation.

I express my most heartfelt thanks to my loving daughter **S.U.Lakshika** who sacrificed her motherhood care at times and during the completion of this work.

**R.Usha**

## LIST OF TABLES

<b>TABLE No</b>	<b>TITLE</b>	<b>PAGE No</b>
2.1	Major enzymes involved in the biodegradation of heteroxylan	9
2.2	Methods for pretreatment of lignocellulosic biomass	10
2.3	Carbohydrate compositions of various xylans	11
2.4	Xylan extraction from different authors	12
2.5	Comparative account of cell wall components in soft and hard wood	13
2.6	List of xylanaolytic bacteria studied by various authors	17
2.7	List of xylanaolytic fungi studied by various authors	20
2.8	List showing cheaper agro residues as substrates for xylanase production	23
2.9	Effect of carbon and nitrogen sources on xylanase production from various bacteria and fungi	31
2.10	Characteristics of xylanases from different microorganisms	33
2.11	Applications of xylanase	38
2.12	Commercial xylanases and their industrial suppliers	41
4.1	Zone of inhibition	67
4.2	Xylanase production by <i>Bacillus subtilis</i> in xylanase production medium using different lignocellulosic biomasses	71
4.3	Detection of carboxy methyl cellulose activity in the culture filtrate of <i>Bacillus subtilis</i>	75
4.4	Effect of different concentration of the substrate on xylanase production by <i>Bacillus subtilis</i>	76
4.5	Effect of pH on xylanase production by <i>Bacillus subtilis</i>	78

<b>TABLE No</b>	<b>TITLE</b>	<b>PAGE No</b>
4.6	Effect of temperature on xylanase production by <i>Bacillus subtilis</i>	79
4.7	Effect of incubation period on xylanase production by <i>Bacillus subtilis</i>	81
4.8	Effect of agitation rate on xylanase production by <i>Bacillus subtilis</i>	82
4.9	Effect of carbon sources on xylanase production by <i>Bacillus subtilis</i>	84
4.10	Effect of nitrogen sources on xylanase production by <i>Bacillus subtilis</i>	85
4.11	Effect of metal ions on xylanase production	87
4.12	Effect of bivalent ions on xylanase production by <i>Bacillus subtilis</i>	88
4.13	Summary of purification of xylanase from <i>Bacillus subtilis</i>	90
4.14	Effect of pH on the stability of purified xylanase from <i>Bacillus subtilis</i>	92
4.15	Effect of temperature on stability of the purified xylanase of <i>Bacillus subtilis</i>	94
4.16	Effect of inhibitors on purified enzyme of <i>Bacillus subtilis</i>	95
4.17	Effect of metal ions on purified enzyme of <i>Bacillus subtilis</i>	96
4.18	Effect of enzyme charge on kappa number of waste paper pulp	97
4.19	Physical analysis of dough and bread attributes	98
4.20	Determination of loaf volume and weight of the bread treated with xylanase	98
4.21	Effect of crude xylanase of <i>Bacillus subtilis</i> and Effective Microorganisms (EM) on composting	102

## LIST OF FIGURES

<b>FIGURE No</b>	<b>TITLE</b>	<b>PAGE No</b>
4.1	Effect of different concentration of the substrate on xylanase production by <i>Bacillus subtilis</i>	77
4.2	Effect of pH on xylanase production by <i>Bacillus subtilis</i>	78
4.3	Effect of Temperature on xylanase production by <i>Bacillus subtilis</i>	80
4.4	Effect of incubation period on xylanase production by <i>Bacillus subtilis</i>	81
4.5	Effect of Agitation rate on xylanase production by <i>Bacillus subtilis</i>	83
4.6	Effect of carbon sources on xylanase production by <i>Bacillus subtilis</i>	84
4.7	Effect of nitrogen sources on xylanase production by <i>Bacillus subtilis</i>	86
4.8	Effect of metal ions on xylanase production by <i>Bacillus subtilis</i>	87
4.9	Effect of bivalent ions on xylanase production by <i>Bacillus subtilis</i>	89
4.10	Effect of pH on the stability of purified xylanase from <i>Bacillus subtilis</i>	93
4.11	Effect of temperature on stability of the purified xylanase of <i>Bacillus subtilis</i>	94
4.12	FTIR Analysis of treated and untreated fibers after 45 days of Bio-softening	105

## LIST OF PLATES

<b>PLATE No</b>	<b>TITLE</b>	<b>PAGE No</b>
I	The lignocellulosic biomasses used as substrates in the present study	60
II	Screening of Xylanase producing isolates	67
III	SEM analysis for the morphology of treated and untreated rice bran xylan	74
IV	Purification of xylanase enzyme from <i>Bacillus subtilis</i>	91
V	Effect of xylanase in bread making	99
VI	Crude xylanase of <i>Bacillus subtilis</i> as detergent	100
VII	Effect of crude xylanase in bio composting	103
VIII	Treated and untreated fibers after 45 days of Bio-softening	104
