TABLE OF CONTENTS

CHAPTER NO.	TITLE	PAGE NO.
I	Introduction	
1.1	Importance of Water	1
1.2	Water Quality and Impacts	2
1.3	Water Pollution	3
1.4	Water Pollutants - Classification	4
1.5	Water Pollutants - Sources	6
1.6	Water Pollution – Control Measures	7
1.7	Physio-chemical Treatment Techniques	16
1.8	Biological Treatment Process	18
1.9	Electrochemical Treatment Techniques	18
1.10	Adsorption	21
1.11	Review of Literature	24
1.12	References	31
II	Aim and Scope	40
III	Experimental Section	
3.1	Identification and Collection of Raw Materials	42
3.2	Categorization of Raw Materials	46
3.3	Microscopic Analysis	48
3.4	Choice of Adsorbate Species	48
3.5	Materials' Modifications	48
3.6	Physio- Chemical Characterization	49
3.7	Elemental Characterization	53

CHAPTER NO.	TITLE	PAGE NO.
3.8	Chemicals Employed	54
3.9	Batch Equilibration Method	54
3.10	Operating Parameters	55
3.11	Sample Analysis	56
3.12	Data Analysis	58
3.13	SPSS Software Analysis	58
3.14	Adsorption Isotherm	59
3.15	Adsorption Kinetics	62
3.16	Thermodynamic Parameters	64
3.17	Synthesis of Bio-beads	65
3.18	Column Studies	65
3.19	Desorption and Regeneration Experiments	68
3.20	Effluent Analysis	68
3.21	Nutrient Application	69
3.22	References	70
	Results and Discussion	
IV	Adsorption using Treated <i>Camellia sinensis</i> stem (TCSS)	
4.1	Microscopic Studies	75
4.2	Physio- Chemical Characterization	76
4.3	SEM and EDAX Analyses	80
4.4	FT-IR Spectral Studies	82
4.5	Batch Equilibration Experiments	84
4.6	Desorption/Regeneration Studies	90

CHAPTER NO.	TITLE	PAGE NO.
4.7	Statistical Analysis	92
4.8	Adsorption Isotherms	93
4.9	Adsorption Kinetics	97
4.10	Adsorption Dynamics	104
4.11	References	106
V	Adsorption using Treated <i>Elaeocarpus tectorius</i> seeds (TETS)	
5.1	Microscopic Analysis	111
5.2	Physio- Chemical Characterization	111
5.3	SEM and EDAX Analyses	115
5.4	FT-IR Spectral Studies	117
5.5	Batch Equilibration Experiments	117
5.6	Statistical Analysis	123
5.7	Adsorption Isotherms	124
5.8	Adsorption Kinetics	129
5.9	Adsorption Dynamics	134
5.10	References	136
VI	Adsorption using Treated <i>Vicia faba</i> husks (TVFH)	
6.1	Microscopic Analysis	140
6.2	Physio- Chemical Characterization	140
6.3	SEM and EDAX Analyses	142
6.4	FT-IR Spectral Studies	144
6.5	Batch Equilibration Studies	145

CHAPTER NO.	TITLE	PAGE NO.
6.6	Adsorption Isotherms	150
6.7	Adsorption Kinetics	153
6.8	Adsorption Dynamics	156
6.9	References	158
VII	Adsorption using Treated <i>Gallus gallus domesticus</i> beaks (TGGDB)	
7.1	Microscopic Analysis	160
7.2	Physio- Chemical Characterization	160
7.3	SEM and EDAX Analyses	162
7.4	FT-IR Spectral Studies	164
7.5	Batch Equilibration Studies	164
7.6	Adsorption Isotherms	170
7.7	Adsorption Kinetics	173
7.8	Adsorption Dynamics	177
7.9	References	178
VIII	Adsorption Using Synthesized Bead Composites	
8.1	Calcium Alginate/ Goethite/ Magnetite – Dopants	180
8.2	M@TETSB Characterization	184
8.3	Effluent Analysis – M@TETSB	190
8.4	References	192
IX	Sorption Capacity/Rate of Synthesized Materials against the chosen Anions - A Comparison	196
X	Column Studies and Employment of Spent Materials as Nutrients for Phosphorus Solubilizing Bacteria (PSB) and Vegetation	
10.1	Column Experiments	198
10.2	Fixed Bed Column – Short Term / Long Term Analyses	198

CHAPTER NO.	TITLE	PAGE NO.
10.3	Fixed Bed Column Experiments - Laundry Effluent	201
10.4	Breakthrough Curve Analysis and Parameters Design - Fixed Bed Column	203
10.5	Field Study - Implementation of FRP Column	207
10.6	Application of PO ₄ ³⁻ enriched TETS as Nutrient	208
10.7	Plant Cultivation Assay	211
10.8	Phytotoxicity Test	213
10.9	References	215
XI	Conclusion	218
