|-------------------|--|---------------------|
|                   | Objective and scope  | 1                   |
|                   | References   | 9                   |
| <b>Chapter I</b>  |  |                     |
| <b>1</b>          | <b>Synthesis of furo quinolines</b>                                      |                     |
|                   | Background   | 13                  |
|                   | Results and discussion   |                     |
|                   | 1.1 Synthesis of 4-phenylfuro[2,3- <i>b</i> ]quinolin-2(3 <i>H</i> )-one | 16                  |
|                   | 1.2 Synthesis of 4-phenylfuro[3,2- <i>c</i> ]quinolin-2(3 <i>H</i> )-one | 24                  |
|                   | 1.3 Synthesis of 3-hydroxy-4-phenylfuro[2,3- <i>b</i> ]quinoline         | 29                  |
|                   | 1.4 Synthesis of 3-hydroxy-4-phenylfuro[3,2- <i>c</i> ]quinoline         | 35                  |
|                   | Experimental   | 43                  |
|                   | References   | 47                  |
| <b>Chapter II</b> |  |                     |
| <b>2</b>          | <b>Synthesis of pyrrolo quinolines</b>                                   |                     |
|                   | Background   | 49                  |
|                   | Results and discussion   |                     |
|                   | 2.1. Synthesis of 3-hydroxy-4-methylpyrrolo[2,3- <i>b</i> ]quinoline     | 52                  |
|                   | 2.2. Synthesis of 3-hydroxy-4-phenylpyrrolo [2,3- <i>b</i> ]quinoline    | 59                  |
|                   | 2.3 Synthesis of 3-hydroxy-4-phenylpyrrolo [3,2- <i>c</i> ]quinoline     | 65                  |
|                   | Experimental   | 71                  |
|                   | References   | 76                  |

| <b>S.<br/>No.</b>  | <b>Title</b>   | <b>Page<br/>No.</b> |
|--------------------|--|---------------------|
| <b>Chapter III</b> |  |                     |
| <b>3</b>           | <b>Synthesis of thieno quinolines</b>  |                     |
|                    | Background   | 78                  |
|                    | Results and discussion   |                     |
|                    | 3.1. Synthesis of 4-methylthieno[2,3- <i>b</i> ]quinolin-3(2 <i>H</i> )-one      | 81                  |
|                    | 3.2. Synthesis of 4-phenylthieno[2,3- <i>b</i> ]quinolin-3(2 <i>H</i> )-one      | 87                  |
|                    | 3.3. Synthesis of 4-phenylthieno[3,2- <i>c</i> ]quinolin-3(2 <i>H</i> )-one      | 93                  |
|                    | 3.4. Synthesis of 4-hydroxythieno[3,2- <i>c</i> ]quinolin-3(2 <i>H</i> )-one     | 98                  |
|                    | Experimental   | 108                 |
|                    | References   | 113                 |
| <b>Chapter IV</b>  |  |                     |
| <b>4</b>           | <b>Synthesis of pyrano quinolines</b>  |                     |
|                    | Background   | 115                 |
|                    | Results and discussion   |                     |
|                    | 4.1. Synthesis of 5-hydroxypyrano[4,3- <i>c</i> ]quinolin-1,3(4 <i>H</i> )-dione | 118                 |
|                    | Experimental   | 125                 |
|                    | References   | 127                 |
| <b>Chapter V</b>   |  |                     |
| <b>5</b>           | <b>Structure activity relationship study of fused quinolines</b>                 | 129                 |
|                    | References   | 156                 |
|                    | Summary  | 159                 |
