 1 [Growth, structural, dielectric and optical characteristics of glycine phosphite single crystals](#)

[Sundari, SS](#); [Kanchana, P](#); (...); [Shobana, C](#)  
 2nd International conference on Advanced Materials - Materials for a Better Living (SCICON)  
 2020 | MATERIALS TODAY-PROCEEDINGS 33 , pp.2203-2208

Interesting compounds are formed when glycine reacts with  
 inorganic materials. These compounds exhibit a...

- 5 [Optical and biological characteristics of novel organic single crystal 4-chloro N-methyl 4-stilbazolium tosylate](#)

[Arunadevi, N](#); [Kanchana, P](#); (...); [Sundari, SS](#)  
2nd International conference on Advanced Materials - Materials for a Better Living (SCICON)  
2020 | MATERIALS TODAY-PROCEEDINGS 33 , pp.2244-2250

When compared with inorganic materials, the molecular organic materials acquire significant interest because of their considerable nonlinear optical prope ... [Show more](#)

- 8 [Efficiency Studies of Galinsoga Parviflora Pigments as a Sensitizer in Pt Free Graphene Oxide/Nickel Oxide Counter Electrode: Dye Sensitized Solar Cell Applications](#)

[Shanmugapriya, T](#) and [Balavijayalakshmi, J](#)

Sep 2021 | Sep 2020 (Early Access) |

[JOURNAL OF CLUSTER SCIENCE](#) 32 (5) , pp.1277-1288

Enriched Cited References

An easily available Galinsoga Parviflora (GP) natural dye has been used as natural sensitizers for dye sensitized solar cell (DSSC). Graphene oxide (GO) is one o ... [Show more](#)

- 11 [Synthesis, Characterization, Biological and Photoluminescence Study of Co\(II\) Complexes of Fused Heterocyclic Ring Systems](#)

13 **Cu<sub>2</sub>FeSnS<sub>4</sub> nanoparticles: potential photovoltaic absorption materials for solar cell application**

[Deepika, R](#) and [Meena, P](#)

Mar 2020 | [MATERIALS RESEARCH EXPRESS](#) 7 (3)

Quaternary semiconductor Cu<sub>2</sub>FeSnS<sub>4</sub> (CFTS) nanoparticle powder have been prepared by a simple chemical technique.
